

Greeting to the striking workers at GM

Colleagues, workers, brothers, and sisters,
Unfortunately, it was not the sister trade union of the UAW, the IG Metall, that informed us about your great strike - let alone calling for active solidarity. For here, too, we are fighting to strike, which is as vital to the working class as the air we breathe.

We fight at BMW, Daimler, Volkswagen, Audi etc. to strike against mass dismissals and against the destruction of the industry of our country by the monopoly capital. We fight for the confiscation of the billions that have been extracted from us so that it can be used meaningfully for society instead of against it. We will continue to fight for the expropriation of the wealth of the billionaires and ensure that they cannot plunge the world even further into the abyss.

Your struggle inspires not only the workers in the USA but also in South Korea, Canada, Mexico, Europe - in short, the whole world. It is a great opportunity to break the chains of the division of our class by the capitalists which make them seem so powerful.

We are one class, we have the same opponent, even if we stand at different sections of a common front. In order to prevent our trade union, here IG Metall, from becoming a worldwide strike-breaker against the workers and peoples of other countries out of consideration for the German monopolies, we have united across the factories in a Revolutionary Front. The workers of GM and other countries are many times closer to us than the masters of the factories.

Those who fight can lose - those who do not fight have already lost.

Yours in struggle
Gerhard Kupfer
